

# ON THE DRAWING BOARD

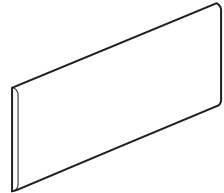

Amneon tackboards, markerboards, mobile easels, lighting and accessories are all designed with one big idea behind them: getting big ideas out there where they can do some good.

What makes these tools work so well can be found in the details: things like 3-ply lamination for our tackboards, the highest quality porcelain on steel for the markerboards, a patented combination power and data strip—all the way down to super strong, four inch twin casters for our easels.

If you need office furniture, compare everything and compare Amneon. We have years of experience making well made furniture for other companies. We have a small portfolio of products, which helps us keep our costs down and the planning simple. We concentrate on making every buying experience hassle-free.

# ON THE OPTIONS
