SeeChange screen capture

CHANGE YOU CAN PLAN ON.

Some things are virtual. Some things are practical. Some things are practically virtual, while others are virtually practical. Few things are both. SeeChange is practical and virtual. SeeChange is interactive 3D software for the design, visualization, and ordering of Amneon office furniture. SeeChange empowers an Amneon representative to work through the entire office furniture layout and ordering process with you—without you ever having to leave your office. You might say SeeChange makes the old way of buying office furniture practically, virtually or even entirely obsolete.

If you need office furniture, compare everything and compare Amneon. We have years of experience making well made furniture for other companies. We have a small portfolio of products, which helps us keep our costs down and the planning simple. We concentrate on making every buying experience hassle-free.

AMNEON
FURNITURE

ON SCREEN

FEATURES

Design and View in Full 3D with Realistic Fabrics and Finishes:

- System Panels
- Worksurfaces and tables
- Filing and storage
- Work tools & accessories
- Fabrics & finishes
- Seating (coming soon)

Design Using:
